## CleanNPCReports

**Usage:** cleannpcreports

**Example:** cleannpcreports

This command will go through your army attack reports and delete all attack and return reports for Barbarian cities as well as transport reports. Use a command like this if you send out mass amounts of NPC farming attacks.

This command will clean all reports generated, not just the ones from the running city.

## CleanReports

**Usage:** cleanreports searchstring

**Example:** cleanreports barbarian  
cleanreports troops,lake

This command will go through your reports searching both 'Subject' & 'To' Headers, & deleting anything that matches your searchstring from them.

This command will clean all reports generated, not just the ones from the running city.

## CompleteQuests

**Usage:** completequests questtype

**Example:** completequests daily  
completequests routine

CompleteQuests will automatically complete any quests that you have available to complete, and receive the awards that come from the quests. It can only be used in one city, you cannot have multiple instances of the command running in others.

Also - **CompleteQuests daily**

## UseItem

**Usage:** useitem itemname

**Example:** useitem Ivory\_Horn

To use an item (not all items can be used with this command)
